When the performances of the suppliers increase, inspection plan is changed and sample sizes are reduced, which enables us to save inspection time.. For instance, there can be differences between the quality performances of a material purchased from supplier A and supplier B.. Mipsis allows you to determine if the incoming and outgoing lots require tightened, normal, reduced or periodic inspection plan.

Mipsis Production Control is a Business software developed by Mipsis Software After our trial and test, the software is proved to be official, secure and free.. The purpose of this inspection is to ensure that the materials and the products meet the specified requirements.
